

CITY OF BOSTON • MASSACHUSETTS

OFFICE OF THE MAYOR  
THOMAS M. MENINO

February 19, 2010

To The City Council:

Dear Councillors;

In response to the 17F request filed by your Honorable Body on 2/3/2010 re: water main breaks for the last ten years, please find the attached response.

Sincerely,

Thomas M. Menino  
Mayor of Boston

**Boston Water and  
Sewer Commission**

980 Harrison Avenue  
Boston, MA 02119-2540

617-989-7000  
Fax: 617-989-7736

February 16, 2010

Honorable Chuck Turner  
Boston City Councilor  
District 7 - Boston City Hall  
One City Hall Square  
Boston, MA 02201

Dear Councilor Turner:

Enclosed is a report on the location of main breaks experienced in Boston over the last 10 years. The report was produced in response to your request for information submitted through the office of Mayor Menino.

As the Boston Water and Sewer Commission is a quasi independent agency, it is not subject to the same processes as are other city departments. If you or other members of the City Council wish to obtain information regarding any activities conducted by the Commission, you may contact the Commission directly. Commission's staff will assure that any information is produced in an expeditious fashion.

According to the American Water Works Association, the Commission's average number of water main breaks per year is approximately 7 times lower than systems of similar size throughout the United States. This statistic is due in large measure to the over \$300 million investment made in Boston's infrastructure over the last 15 years.

As to the specifics of the request, the attached notes the street number or intersection, street name, neighborhood, service zone and date where each break occurred. Water losses associated with main breaks are not tracked as requested. Water losses are calculated as a result of the difference between Commission sales to its customers and purchases made by the Commission from the Massachusetts Water Resources Authority (MWRA). Please note that the times at which main breaks occurred appears on the reports from 2003 through 2009. More in-depth historical research would need to be conducted in order to ascertain times associated with work activity prior to 2003. Where there appears an abbreviation, e.g. "FS" in the time column that means these breaks were reported by Commission personnel who regularly examine the system for leaks. The Commission has settled 34 cases arising out of these main breaks.

If the Commission may provide any more information on this or any other matter, please contact me at (617)989-7361.

Sincerely,

Thomas Bagley  
Deputy Director of Communications
