Boston Conservation Commission
Local Wetlands Ordinance
July 10, 2013
7:45 PM
City Hall, Room 801

Please join us to continue the development of Boston's first Local Wetlands Ordinance!
At this listening session we will be reviewing:

Guiding Principles and Impacts of the Local Wetlands Ordinance

This is our final listening session. If you or your group would like to request an individual stakeholder meeting, please contact Stephanie Krueel: stephanie.krueel@cityofboston.gov

Why are we developing a Local Wetlands Ordinance?

- Superstorm Sandy and other recent events have highlighted the fact that coastal cities are vulnerable to the effects of climate change and must be prepared for a future that will bring more and more coastal flooding.
- Massachusetts municipalities can enact local wetlands ordinances (LWO) that provide greater authority to protect more resource areas, protect existing resources to a greater degree, and consider how future conditions will affect resource areas. A carefully prepared LWO is a critical component of the plan to make Boston more resilient to projected changes in the climate.
- In February of 2013, Mayor Thomas M. Menino asked the administration, with guidance from the Conservation Commission, to draft a Local Wetlands Ordinance proposal that would address the impacts of climate change on the relationship between the natural and built environments.
