

# wireless IN BOSTON

come join us

Mayor Thomas M. Menino invites you to a community forum to learn about and discuss the development of a wireless network in Boston:

**Saturday, May 6, 2006**

**8:30 a.m – 12:00 p.m.**

Wentworth Institute of Technology

550 Huntington Avenue, Watson Auditorium, Mission Hill

Green Line "E" to Museum of Fine Arts stop or Orange Line to Ruggles stop

Mayor Menino has appointed a Wireless Task Force that is seeking input from the community about the benefits of developing a city-wide wireless network. The half-day forum is completely free of charge and will include information from technical experts, community organizations, vendors and city agencies about wireless (also known as "WiFi") networks that allow users to access the Internet anywhere using wireless radio connections.

## we need your input

In addition to learning about this new technology, give us your ideas on how a Boston wireless network can:

- » Reduce the Digital Divide
- » Improve the economic development opportunities for small businesses
- » Improve the quality of and access to city services

**To register (the forum is free and open to the public) and for more information and directions go to [www.cityofboston.gov/wireless/](http://www.cityofboston.gov/wireless/) or call 617-918-4343. If you can't attend the forum please give us your ideas at [www.cityofboston.gov/wireless/](http://www.cityofboston.gov/wireless/).**

*Sponsored by the City of Boston in partnership with the John Adams Innovation Institute, the economic development division of the Massachusetts Technology Collaborative, the Boston Foundation, the Museum of Science and the Boston Digital Bridge Foundation.*
